Assessing and Reporting: Standards-Based Reporting Beginning in 2016-17

Meaningful on-going assessment and feedback are integral parts of learning. A student's level of proficiency should reflect the most accurate, relevant demonstrations of the standards assessed during the reporting period.

At the end of a reporting period, there will be a summative evaluation of the student's demonstration of learning for the reportables covered in each subject/course on the report card. Reportables are a summation of the respective learning standards in the subject area. Student progress in the areas of those Reportables will be communicated using proficiency levels.
